FOR IMMEDIATE RELEASE

VADD Construction Services Welcomes Matthew S. Raio as Chief Operating Officer

Bringing 30 years of expertise in the data center and construction industries, Raio strengthens VADD Construction Services' leadership team.

Ashburn Va, September 16, 2024 – VADD Construction Services is proud to announce the appointment of Matthew S. Raio as Chief Operating Officer. With a distinguished 30-year career in the data center and construction sectors, Raio brings a wealth of experience and strategic insight to this new role, where he will oversee the company's operations and continue to drive its mission of delivering exceptional service.

Raio's career began in 1995 with DSA Encore LLC, where he quickly established himself as a pivotal force within the organization. Initially hired as a critical infrastructure sales associate, he soon advanced to Director of Procurement Services in 2005. In this role, Raio expertly identified, negotiated, and acquired the right suppliers for DSA Encore and its sister company, DSA Mission Critical Services. In 2013, Raio was promoted to Vice President and General Manager of DSA's Restoration Division, where he led the decommissioning of data centers with precision and minimal risk. Under his leadership, the division saw record growth, with a focus on maximizing customer return on decommissioned assets.

In 2016 Raio joined LEL International quickly establishing the LEL Decom brand into the nation's leading provider of data center decommissioning and restoration services. He has served this division as President until September of 2024.

Raio's vast experience and proven leadership in staff development, P&L oversight, strategic planning, and multi-million-dollar contract negotiations make him a valuable asset to VADD Construction Services. His expertise in conflict resolution, resource allocation, and global sourcing will help steer the company to new heights of success.

"I am excited to join VADD Construction Services and look forward to leveraging my experience to help the company continue its growth trajectory," said Raio. "Together, we will build on VADD's reputation for excellence and deliver innovative solutions to meet our clients' evolving needs."

About VADD Construction Services

VADD Construction Services is a leader in providing top-tier construction services with a focus on data centers and critical infrastructure projects. Our mission is to deliver superior results through expertise, innovation, and dedication to customer satisfaction.
